Professional Profile

Fourth-year BSc Computer Science student with hands-on experience in full-stack web and mobile development, databases, networking, IoT, and system support. Experienced in building practical software solutions using modern frontend and backend technologies, integrating databases and APIs, and translating real-world requirements into functional systems.

Technical Skills

Languages: Java, C, C++, JavaScript, TypeScript, Python

Web & Mobile: React.js, Vite, Flutter, HTML, CSS, Tailwind CSS

Backend & Databases: PHP, Django, Firebase, MySQL, REST APIs

Tools & Technologies: Git, GitHub, VS Code, IntelliJ IDEA, Android Studio, XAMPP, Cisco Packet Tracer, IoT Sensors & Actuators

Projects

Graduate Tracer System — MUGTS / Pathfinder

- Developed a full-stack university platform for graduate records, tracer surveys, recommendations, notifications, and graduate engagement.
- Implemented role-based workflows for Graduates, Management, and Administrators.

Live: maseno-pathfinder.vercel.app

Student Missing Marks & Unit Registration System

- Developed a system enabling students to register units and report missing examination marks through structured academic workflows.
- Enabled lecturers, HODs, and administrators to review cases, follow up unresolved marks, and manage academic records.

Live: ecampus2.maseno.ac.ke/stars/login.php

AgriLink-X — Agricultural Marketplace

- Developed a full-stack marketplace connecting farmers, buyers, and companies for agricultural product discovery and transactions.
- Implemented authentication, product management, role-based access, database integration, and marketplace workflows.

Live: agrilink-kenya.vercel.app

Filing System

- Developed a digital records management system for organizing, uploading, storing, retrieving, and managing documents.
- Built the complete application using HTML, CSS, JavaScript, PHP, and MySQL on XAMPP.

Industrial Attachment

Maseno University — eLearning Department | Kisumu City Campus

May 2026 – August 2026

- Contributed to the development and testing of university academic and administrative systems using React, JavaScript, TypeScript, Tailwind CSS, PHP, and MySQL.
- Developed features for Unit Registration and Missing Marks, enabling students to report and track missing marks while supporting lecturer, HOD, and administrator workflows.
- Worked on academic data processing, including data cleaning, database preparation, marks processing, and system integration.
- Contributed to the Graduate Tracer System and Digital Filing System, working across frontend, backend, database, authentication, notifications, and system integration.
- Strengthened practical skills in REST APIs, database management, debugging, testing, deployment preparation, teamwork, and translating institutional requirements into functional software.

Industrial Training

Masinde Muliro University of Science and Technology (MMUST)

May 2025– August 2025 | Second Year

- Performed hands-on desktop computer maintenance, including disassembly, internal cleaning, component inspection, and reassembly.
- Installed and configured CCTV surveillance systems and Wi-Fi networks, including routers and wireless access points.
- Performed Ethernet cable termination and crimping using RJ45 connectors and practiced network connectivity troubleshooting.
- Used Cisco Packet Tracer to design, configure, and simulate networks, including IP addressing and connectivity testing using ping.
- Worked with IoT sensors and actuators, applying the knowledge to develop the Smart Borehole Management System for real-time monitoring.

Education

Masinde Muliro University of Science and Technology (MMUST)

Bachelor of Science in Computer Science | 2023 – 2027
